Lab-optic
"Your advantage.....our experience"

With LabOptic cleaning solution, you can clean any kind of lenses. LabOptic cleaning solutions have antistatic properties. We offer this product prepared by our chemist with our 8cc, 30cc, 50cc, 110cc, 250cc transparent bottles. It is possible to produce with your brand.

EYEGLASSES CLEANING SPRAY

Lab-optic
"Your advantage.....our experience"

We've all done it. When our glasses get dirty, we reach the corner of our shirt and clean them. You probably know it's the wrong way to clean the glasses, but you're still doing it. The reason why the shirt sucks for glasses cleaning is to cause dust to come into contact with the glass and scratch it. When the lenses are drawn, they both affect our vision and carry your vision problem to the next level. Therefore, the lens cleaner solution and microfiber cloth offer you precise results. If you use it, you are protecting yourself both financially and in terms of your health. When choosing the solution, we would like to remind you of the importance of supplying from MSDS certified companies, because the solutions produced by unconscious people will neutralize the features of your glasses that you bought expensive and will increase your eye health problems. For this reason, the manufacturer of Solution and Microfiber Cloth is very important for this sector.
